

(Feb. 1, 2011) A [Legal Reform Summit](#) sponsored by big pharma and insurance companies is taking place today in Harrisburg. They want to ram through bills that would weaken our civil justice system. It's another corporate bailout and this time everyone will pay.

Throughout the day, your Pennsylvania Association for Justice will be watching and listening -- and contacting media outlets with the truth about who really profits from this legislation. The messages share a common theme: Big business needs to tell the truth that their bailout legislation will shift the costs of injury away from those responsible and onto the injured people.

Please look for a special E-News this afternoon covering today's event.

Scott Cooper, Esq.
Pennsylvania Association for Justice Vice President
